

## **Hayden Phelps**

La Salle, CO - Field Service / Maintenance Technician - Authorized to work in the U.S.

### **About me:**

Hands-on maintenance technician with experience working around automated production equipment, industrial sensors, and process instrumentation. Background includes installing and troubleshooting VEGA level sensors at The McGregor Company, supporting manufacturing environments, and building personal IoT projects. Strong interest in field service, automation, and industrial systems with a willingness to travel and learn. I take pride in my work and maintain a strong focus on quality, safety, and attention to detail. I am always looking to improve my skills and learn new technologies.

### **Experience:**

Maintenance Engineer 2 – Flowers Foods (Canyon Bakehouse) | Johnstown, CO | 2025 – Present

- Troubleshoot and repair automated production equipment including slicers, baggers, palletizers, conveyors, ovens, and MAP systems.
- Respond to breakdowns in a high-volume manufacturing environment and perform preventive maintenance.
- Work around industrial sensors, motors, pneumatics, and electrical systems.
- Exposure to Allen-Bradley and Siemens control systems.
- Document work orders and communicate equipment status with operations and management.

Operations & Service Technician – McGregor Company | WA | 2024 – 2025

- Installed and supported VEGA radar level sensors and remote monitoring gateways.
- Troubleshot process equipment and systems in fertilizer and NH3 environments.
- Assisted with wiring, fabrication, and custom on-site solutions.
- Performed preventive maintenance on pumps, compressors, and site equipment.
- Supported remote monitoring and basic data systems.

Maintenance Technician – Garfield County Hospital | WA | 2022 – 2024

- Performed facility maintenance, equipment repair, and low-voltage installations.
- Supported work order system and preventive maintenance programs.

### **Technical Skills:**

Instrumentation & Electrical:

Industrial sensors, low-voltage wiring, electrical troubleshooting, process instrumentation

Industrial & Mechanical:

Automated equipment, preventive maintenance, pumps, compressors, fabrication, mechanical repair

**Controls & Systems:**

Exposure to Allen-Bradley and Siemens controls, remote monitoring systems, automation troubleshooting, Banner Photoelectric and Prox Sensors.

**Field & Technical:**

Customer-site work, documentation, diagnostics, Excel reporting, basic networking/IT support.

**Certifications:**

CPR / First Aid

Valid Driver's License

Hazardous Materials Cert - The McGregor Company
